

Tanadol Deachprapakorn

Bangkok, Thailand, +66805296552, tanadol-de@outlook.com, <https://putawande.github.io/>

Web & Mobile Software Engineer building high-traffic Next.js and Flutter apps platforms. Shipped a Top 40 App Store app, a 31K-follower Twitter bot, real-time multiplayer apps, and an international award-winning project.

Education: B.Eng in **Computer Engineering** (*First-Class Honors, GPA: 3.81*) | Chiang Mai University (*May, 2024*)

Skills

Languages & Core: JavaScript, TypeScript, HTML/CSS, Java, Dart

Frontend: React, Next.js, Flutter, Tailwind CSS, MUI, NextAuth, WebSocket, Performance Optimization, Accessibility (A11Y), SEO

Backend/DevOps: AWS (Lambda, Kinesis, S3, CloudFront, ECS), Node.js, Serverless

Engineering: Object-Oriented Programming, Functional Programming, Git

Spoken Languages: Thai (Native), English – IELTS 7.5 (CEFR C1)

Experience

Web / Mobile Software Engineer at WealthX / LTMH **May 2024 – Present**

- Shipped core WealthX Flutter fund-trading features, migrated rendering from Skia to Impeller and optimized rendering, cutting frame times by ~30% and delivering a stable 60 FPS on low-end devices.
- Maintained high-traffic Next.js, Flutter financial apps (Blockdit, Longtunman, WealthX). Upgraded theme system to reduce Cumulative Layout Shift (CLS) by ~30%. Improved SEO with JSON-LD and sitemaps.
- Engineered App Links, mobile download flows, analytics, and WebView integrations to optimize onboarding from a 2.6M-follower Facebook audience.
- Delivered high-impact features including a CMS-driven careers page (enabling HR self-service for 10+ listings), company websites for IPO readiness, and financial UIs with order history/progress trackers.
- Developed a proof-of-concept AWS serverless deployment to evaluate scalability and reduce cloud costs.

Front-End Developer (Freelance) at Namjai Development Team **June 2023 - October 2025**

- UX/UI designer and a front-end developer using React, TypeScript, Tailwind CSS, and MUI to develop a crowd-funding platform targeted to children's development.

Front-End Developer (Volunteer) for National Assembly of Thailand **November 2023 – March 2024**

- Developed a React-based platform to visualize revisions in the 2017 Constitution of Thailand, enabling interactive exploration of legal changes for lawmakers and researchers.

Chatbot Developer Intern at Amity Solutions **June 2023 - October 2023**

- Built frontend interfaces using React for NLP-based chatbot solutions tailored to enterprise clients.
- Implemented an analytics pipeline using AWS Lambda, Kinesis, and S3.

Projects and Awards

[Airwareness–Air Pollution Report and Photo Sharing App](#) **March 2026**

- Built a cross-platform mobile app with live air quality, AQI data, forecast and IG-style camera stickers; achieved Top 40 in Weather on the Thailand App Store.

[Witch Hunter](#) **March 2024**

- Developed a real-time multiplayer game with network replication and gameplay inspired by Dead by Daylight.

1st Place, Thai National Level, IEEEExtreme Programming Competition **November 2023**

[Neural Network from Scratch and Trained with Various Learning Methods](#) **July – October 2022**

The Design Award, IDC Robocon 2022 at Tsinghua University, Beijing **August 2022**

[CARIN - A Single Player Online Turn-based Game](#) **August 2022**

- Used Java Spring Boot, WebSocket and React to develop an online game featuring a code parser, interpreter to control characters enabling dynamic character behavior.
